SKILLS

Backend

- Node.js
- Express.js
- JavaScript
- React
- Kafka
- Micro Services
- RESTful APIs
- MySQL
- PostgreSQL
- PHP5 and Above
- Git and github
- CI / CD and test automation
- Azure
- AWS
- AWS Lamda
- Dockers
- MVC CodeIgniter
- Laravel Framework
- MS SQL Server
- Web development
- Object-Oriented programming
- JWT
- OAuth

DevOps & Tools

- Docker
- Git
- AWS
- Azure
- CI/CD
- Linux

LANGUAGES

- English
- Hindi

Anil Sen

PROFESSIONAL SUMMARY

Dynamic Software Engineer & Team Lead with 12+ years of experience architecting scalable, microservice-based applications in Node.js, ExpressJs, JavaScript, React and PHP. Proven expertise in serverless computing, containerization, and MySQL optimization, with a track record of delivering high-performance solutions. Spearheaded an API redesign that reduced latency by 40%, significantly improving user engagement. Adept at leading cross-functional teams, mentoring developers, and driving collaboration across engineering, product, and QA. Skilled in managing agile sprints and executing multi-project roadmaps. Experienced in building real-time web applications and sophisticated back-end systems, including CMS, e-commerce platforms, chat systems, CRM tools, and communication interfaces. Recognized for fostering innovation in cloud-native development environments and delivering complex solutions at scale.

EXPERIENCE

Grant Thornton Bharat

2022-08 - Present

Assistant Manager - Team Lead • Bangalore

- Implemented RESTful APIs, boosting data processing speed by 25% using Express.js and PostgreSQL.
- Optimized high-traffic applications, reducing server response time by 35% for better user experience.
- Collaborated with front-end teams using React, ensuring seamless integration of user-facing elements.
- Improved backend performance by 30% using Node.js and Redis caching
- Worked on microservices architecture with Docker and Kubernetes
- Used Agile development methodologies as part of continual software evolution and innovation

DB Corp Ltd.

2018-11 - 2022-07

Sr. Software Developer • Bhopal (MP)

- Architected and led the development of a microservices-based platform using Node.js and Postgres Sql, resulting in a 40% increase in transaction speed and a 25% boost in customer satisfaction scores.
- Optimised a real-time data processing pipeline using Node.js streams and Apache Kafka, increasing throughput by 200% and reducing latency from 5 seconds to 50 milliseconds. Built modular UI components using React and Tailwind CSS
- Implemented a CI/CD pipeline with Docker, Kubernetes, reducing deployment time by 75% and enabling 20 daily releases with zero downtime.
- Enhanced and enforced software solutions to meet client requirements, enhancing system functionality and user satisfaction.
- Conducted code reviews and quality assurance tests, maintaining high standards of code integrity and reliability.

Ira Softwires

2014-09 - 2018-11

Sr. Software Developer • Indore (MP)

- Designed an innovative eCommerce platform using PHP, which boosted the company's online sales by 35%.

- Migrated legacy systems to modern PHP frameworks, reducing the codebase by 50%, improving performance, and enhancing maintainability.
- Implemented secure coding practices in PHP, effectively minimizing security risks by 40%.
- Integrated API's, which greatly improved the efficiency and functionality of the company's mobile applications.

PROJECTS

Green Track

Demo: <https://traceability.livaconnect.com>

- Enhanced the Webservices and API on Node Js, Express Js
- Integrated server-side caching mechanisms, which slashed server resource consumption by 20%,
- Write clean NodeJS, ExpressJs and efficient SQL., Load Balancing, Update current websites and write semantic markup, Evaluate, design, develop, and assist application systems
- Maintain detailed records of website specifications, product details, functionalities, deadlines, structures, and more.

Ad Portal

Demo: <http://m.ads2db.com/>

- Developed the Webservices and API on PHP Framework CodeIgniter.
- Creating and managing corn in the beginning of day and end of day process for different servers.
- Update current websites and write semantic markup.

KEY ACHIEVEMENTS

Enhanced Application Performance

Played key role in optimizing server performance by 35%, resulting in enhanced user experience.

Data Processing Speed Optimization

Improved data processing pipeline efficiency by 25% through redesign of API architecture.

Mentored Junior Developers

Led mentoring sessions, boosting team skill level and productivity by 20% over 6 months.

EDUCATION

Rajiv Gandhi technical University

2005 - 2009

Master Of Computer Application (MCA) • Bhopal (MP)

Barkatullah University

07/2001 - 06/2005

Bachelor of Science Computer • Bhopal (MP)

M P Board

07/2000 - 07/2001

Higher Secondary • Bhopal (MP)

M.P. Board of Secondary Education

07/1999 - 07/2000

High School • Bhopal (MP)
